## Education

- ❑ Lawrence High School Graduate, class of 2013
- ❑ University of Kansas, Bachelor's Degree of Liberal Arts, 2021  
Major in Psychology with an emphasis on Quantitative Psychology - SPSS, Psychometrics, Python-based survey designs

## Goals

While attending the University of Kansas in pursuit of my undergraduate degree in Psychology, I developed and designed an online multiplayer game with GameMaker

Studio 2, Node.js, Digital Ocean, and Github. After graduating, I attended a Full Stack Developer Bootcamp via Trilogy Educational Services in collaboration with the University of Kansas. Here I concretized what skills I had already developed, and further established a solid foundation in front-ended and back-ended projects pertaining to websites, applications, servers, databases, etc. via HTML, CSS, Express, and MySQL.

I hope to continue to delve deep into these domains at an occupational level. I am a diligent and punctual developer who loves problem solving and achieving complex goals. I hope that if I were to be hired as a developer, I'd be surrounded by peers who were like-minded in regards to a shared passion for learning and creating the best user experiences.
